PROFILE I'm a passionate and driven programmer with a BS in Information Technology, excited to kick-start my career in IT! I played a key role in our capstone project, where developed a website and successfully brought it all to completion. Graduating college and finishing this project are my proudest achievements so far. I'm skilled in web development, front-end and back-end coding, and always eager to learn more!

PROJECT **TODA MANAGEMENT SYSTEM – FULL STACK WEB DEVELOPER (Capstone/Thesis)**
TODA Management System is a web-based platform developed specifically for our tricycle drivers. It allows them to manage their tricycles and monitor their routes efficiently. The system integrates two key devices: GPS for real-time tracking and RFID cards for secure identification and access. In addition to management and tracking features, the website also offers a tricycle rental service for drivers who do not own their own units. This ensures that every driver has the opportunity to work and earn, regardless of ownership. The system is built using Bootstrap, HTML, PHP, JavaScript, and MongoDB, ensuring a responsive, interactive, and reliable user experience.

IMS (Inventory Management System) is a personal project designed to efficiently manage inventory operations. The system allows users to perform full CRUD (Create, Read, Update, Delete) operations on brands, categories, and products. A key feature of the system is the audit trail, which monitors and records user activities within the system providing accountability and transparency. Additionally, the system includes the ability to generate PDF reports, making it easy to document and share inventory data. This project is built using Laravel, PHP, HTML, JavaScript, Bootstrap, and MySQL, ensuring a modern, responsive, and scalable solution.

EDUCATION **Bachelor of Science in Information Technology (BSIT), Colegio De Montalban (2021-2025)**
Information Communication Technology (ICT), Lagro High School – Senior high (2019-2021)
Ramon Magsaysay (cubao) High School (2015-2019)
